Transforming Your Practice with Digital Technology

June 9 – 10, 2023
New York City
CE: 12 CE credits

This course is designed to teach the entire dental team how to integrate a digital workflow into a dental office. Clinicians are encouraged to attend this course with their assistants, hygienists, laboratory technicians, and treatment coordinators.

At the conclusion of this two-day course, the entire dental team will have a clear understanding of the major components that make up a successful private practice.

Objectives

- Learn how to integrate a digital workflow into any type of dental practice from the initial visit to definitive prosthesis delivery.
- Gain detailed hands-on experience in the entire digital process (data acquisition, treatment planning, scanning, CAD/CAM, and prosthesis delivery) in a clinical setting.
- Test drive the digital technology available in dentistry today with one-on-one training.
- Understand which digital technologies can be integrated in the dental office and which ones
- may be outsourced to a dental laboratory/milling facility.
- Learn about expanding your practice with bruxism, sleep apnea/snoring, and whitening services.
- Discuss task delegation to improve efficiency and productivity.
